Mines and Mining Stocks

SCOTTISH CHIEF TO

Less Than 100 Feet to Go to Determine Whether It Has Mine.

Having just levied its fourteenth assessment of one cent a share, and after having expended the total of \$65,971 since the company was formed, the Scottish Chief Mining company is spout to emback upon the leg of exploratory work which is expected to demonstrate whether there is a mine in that portion of Scott Hill which its

not would it be expected, for it is all in thinly bedded shale and quartzite country rock.

A line thinly bedded shale and quartzite country rock. ite country rock. A limeatone favorable to ore deposition, between 40 feet and 60 feet thick is known to exist 250 feet below the 250 feet below the tunnel a a point on the fissure where the in clined winze is being put down, and the objective point of the present work is to reach the lime bed at its inter-section with the fissure. Less than 100 feet of work remains to be done to reach the bottom of the lime bed montioned and with that work mentioned, and with that work ac-complished, the mine will have been completely prospected."

Bond Is Extended. On account of failure to get it lease and bond extended in time to lay in winter supplies, the company sus-pended operations last fall. Since that time the desired extension has been granted, the bond and lease running until July 11, 1911, upon more favor

able terms than before.

In doing its exploratory work the Scottish Chief has had little to guide it except the reading of the formation, it having been the pioneer operator in the Scott Hill portion of the Park City district, the formation of which has, however, appealed strongly to the most noted of experts. Ore has recently been encountered in the lower lime beds, it is reported, by lower lime beds, it is reported, by the Iowa Copper company. Share holders who have backed the Scottist Chief will be gratifled to know tha the assessment just levied will per form the work which will "tell th story" as to that company's future.

NEVADA HILLS DRIFTS FIFTY FEET IN RICH ORI

After having drifted close to 50 feet in the ledge which was recently picked up east of the big fault in the Nevada Hills mine, the management reports the ore body holding as strong as ever, there being a least a full fact of ore, the lowest assays from which show values in silver and gold of \$75 at on. Details concerning the source show values in silver and gold of \$75 a ton. Details concerning the source of the carload of \$117 ore received at the smelter a few days ago have not been received, but it is presumed to be ore which was taken out in following the fault. Manager Webber having reported that the drag of the fault yielded enough high-grade ore to pay for doing the work.

KUHINOOR STRIKE MAY RESULT IN NEW MIL

Portland capitalists who are interested in the Kohinoor mine, in east ern White Pine county, Nevada, ar examining the property with the view of undertaking more extensive development and of building a mill to trea the ores. A body of rich silver-gol ore was opened in the property about a month ago in an old abandoned shaft a month ago in an old abandoned shaft, and that strike, with the ore previously developed in other portions of the mine, is believed to place the property in position to be made a steady producer. Robert A. Millick, an old time operator of White Pine county, is manager of the Kohinoor.

PICTURE ROCK IN

W. H. Clark Uncovers Unexpected Riches on Large Milling Project.

in the Yuma county, Arizona, property

cluded from the samples taken, from which the average value of the low-grade rock was obtained. In fact, no assays have yet been taken of the high-grade ore, which plainly shows that it is entitled to be classed as "pic-

District Is Isolated. The district in which the find has been made is the Alamo, which is in the range of mountains between the Eagle Tail and the Plumas ranges. It is a new country, so far as development is concerned, the region having been particularly isolated prior to the building of the Santa Fe cutoff. The only mines in that section are the North Star and the King, each of which is about five miles, in opposite direc-

North Star and the King, each of which is about five miles, in opposite directions, from the Clark property. The mineralized zone is about ten miles long by eight miles wide. It is a porphyritic formation, cut by enormous parallel reefs of quartz. In a general way the important characteristics of the formation are similar to those of Goldfield.

The outcrop of the principal vein in the Clark property is fully fifty feet wide, and it is said that virtually everything found in the ledge which has been opened will pan gold. The ore carries some silver, but gold largely predominates; it is apparently an ideal cyaniding project, making it one of the big prospects of the country, for the cost of mining and milling will be very low.

ry low. The holdings of Mr. Clark and as The holdings of Mr. Clark and assiciates comprise a group of several claims upon what is regarded the begoriton of the mineralized zone. To work done up to this time is all a prospecting nature, but the resulare such that systematic developments will be undertaken at once. Mr. Clark in the camp within a few days to inaugurate the new work. days to inaugurate the new work

OSCEULA PLACERS

to Working Ground Rich in Gold.

Development and operation by modern methods of the old placer gulches in and around Osceola, Nev., is contem plated by Colorado capitalists, who are arranging to float a million-dollar cor poration for the purpose, according to

taking them over have been agreed

T. B. Tilford, who has been engaged in placer mining at Hogum for more than thirty years, has given an option on his placer claims. Mr. Tilford has extracted about \$30,000 from his holdings by crude mining methods during the last decade.

the last decade.

Among other properties that will likely be taken over by the Denver people are the possessions of John C. Marriott, Chan Bliss and the estate of the late Jacob Henderson. It is understood that the Osceola people have entered into an agreement to sell their holdings to the Denver company.

The Osceola placer gulches gained an enviable reputation during the early days, for the production of gold nug-

days, for the production of gold nug-gets, but in recent years mining op-erations of that character have been retarded through the lack of water. A nugget valued at \$3,500 was taken from the Osceola diggings in 1878. Mrs. Winslow's Soothing Syrup.

FOOD AND DRUG ACT, June 30, 1996,
SERIAL NUMBER 1.098. Aside from the Pittsburg-Salt Lake and the Standard Reserve, the International Consolidated is the third company operating in the Spring Valley field, which is directly on the Union Pacific railroad. The Pittsburg-Salt Lake and the International Consolidated have five producing wells each; the well just brought in is the third the well just brought in is the third for the Standard Reserve. The field has for some time been producing at the rate of about 200 brrrels a day. The entire output is handled by the Pittsburg-Salt Lake company, which has a refinery and place lines in the Pittsburg-Salt Lake company, which has a refinery and pipe lines in the field. It has recently, however, been turning over the output to the Utah Oil company, which is operating a refinery in this city. The oil is high gravity, bringing \$1.50 a barrel, the highest price paid for oil in the United States, it is said.

The Spring Valley field is said by experts to be precisely the same, as to geological age and other features, as the field in Uintah county, Utah. Saltair bathing best ever.

PROBATE AND GUARDIANSHIP

NOTICES. (Consult county clerk or the respective signers for further information.)

IN THE DISTRICT COURT, PRO ounty, Utah. In the matter of the estate of J. T.

to geological age and other features, as the field in Uintah county. Utah. Both are described as fissured fields. The wells thus far brought in are relatively small producers, but the lack of quantity produced is more than overcome by the relatively high grade of the oil. The geological structure, the experts contend, is such as to make it likely that wells of 200 barrels to 1,000 barrels capacity will be brought in at any time.

The new gusher—the Pittsburg-Salt Lake company having previously brought in a well of the same character—is pretty sure to attract a good deal of new attention to the Spring Valley field and the neighboring field in Utah. Guffey & Galey, the well-known Pennsylvania operators, are said to be already at Spring Valley acquir—

To geological age and other features, county, Utah.

In the matter of the estate of J. T. Farris, deceased.—Notice.

BINGHAM IMPRESSES
BUTTE AND BOSTON MEN

That Bingham is certain to become the greatest mining camp in the world and that, considering its payroll of about a million dollars a month and its dividends of close to seven million dollars a year, the remarkable growth of Salt Lake City is not to be wondered at, is the verdict of a party of Boston and Butte capitalists which have been visiting a number of prominent mines of the camp.

Walter B. Farmer, W. E. L. Dillaway, E. A. Fordyce and E. H. Baxter, all of Boston and all interested heavily in the Utah Metal Mining company, had been the seal thereof affixed, this 31st day of Margaret Zane Witchen.

IN THE DISTRICT COURT, Probate division, in and for Salt Lake county, State of Utah.

In the matter of the estate of Phineas H. Young, deceased.—Notice.

The petition of Helena Young praying for the issuance to herself of letters of administration in the estate of Phineas H. Young, deceased, has been set for hearing on Friday, the 17th day of June, A. D. 1910, at 2 o'clock p. m., at the county court house, in the court room of said court in Salt Lake City, Salt Lake county, Utah.

Witness the clerk of said court, with the seal thereof affixed, this 31st day of Margaret Zane Witchen.

Utah Metal Mining company, had been several days examining the properties of that company when, Wednesday, they were joined by W. E. Hubbard of tioner. (Seal) Cl By L. P. Palmer, Deputy Clerk Evans & Evans, Attorneys for Peti-

they were joined by W. E. Hubbard of Sait Lake and a Butte contingent comprising Samuel Binder, Harry Kippe, Louis Brecktel, Thomas Roberts and J. L. Sampson, who have large interests in the Bingham-Butte Mining company.

The combined party visited a number of the big mines and the coming big of the big mines and the coming big ing for the issuance to William Service J. L. Sampson, who have large interests in the Bingham-Butte Mining company.

The combined party visited a number of the big mines and the ceming big mines of the camp, including Utah Copper, Ohio Copper, Bingham-Butte and Utah Metal, with the result that they were afforded an entirely new conception of the greatness of the greatest copper district.
